CDs for competitions

Can all competitors make sure of the following:

1. The CD is handed in to the correct location in plenty of time.
2. The CD is in a non damaged case.
3. The CD and case are labelled with the skaters name.
4. Nothing is stuck to the disk other than approved CD labels (i.e. do NOT stick any other labels on the disk as it can seriously damage the CD player and is also likely to cause the music to misplay).
5. Examine the disk to make sure that it is clean, unscratched, is not cracked and has no water damage.
6. Make sure that the CD contains only one track. Only the first track will be played. It has been known for one piece of music to comprise of a number of tracks, if this is the case then the music is likely to stop part way through the routine.
7. Carry a spare CD and be ready to produce it at short notice as any problem will only become apparent at the time of the routine.
8. Remember that just because your CD has played on other CD players does not guarantee that it will play on the CD player in the AV room. Please look after your CDs as the rink is a very hostile place for them.
